

**PoliLog**  
SMART LOGISTICS SERVICES

**Flexible and customized logistics  
to develop your business**

**Servizi flessibili e personalizzati per sviluppare il vostro business**

## Goods reception

Upon arrival, goods are inspected to verify quantity, integrity, and compliance. Each item is then registered in our IT systems, ensuring full traceability throughout the entire process. This guarantees that every product is accurately identified and ready for the next stages of storage or shipping.

## Quality control

Our technical staff performs product quality inspections either on a statistical basis or 100% inspection, depending on your specific requirements. We inspect both semi-finished and finished goods, upon receipt and prior to dispatch, following your provided inspection guidelines. We are also able to issue detailed inspection reports for each individual lot.

Upon request, we can carry out 100% conformity checks before final shipment, ensuring full traceability of every production batch.

## Inventory Management

We store goods according to your specific requirements, monitoring internal environmental conditions such as dust levels, lighting, humidity, and temperature.

Inventory is managed in accordance with your instructions, including FIFO or LIFO methods, to ensure correct picking sequences. Our IT system keeps stock levels synchronized, ensuring full alignment between physical inventory and your IT systems.

## Order processing

We manage and process packing services and shipments through our IT systems, integrated with warehouse stock management. Our IT department handles the connection between our IT systems and yours, allowing the exchange of data and order processing in real time.

## Order Preparation & Packing

We manage order preparation with maximum accuracy and efficiency, ensuring speed and reliability. Each stage is carefully monitored to guarantee on-time deliveries and consistent quality standards.

## Distribution & Delivery

We offer both standard and express delivery solutions, thanks to an extensive and established logistics network, supported by a strategic location that allows us to optimize transport times.

This enables us to guarantee an efficient, timely, and reliable service across the entire territory.

## Co-Design Packaging & Labels- Sustainability

Our technical department is always available to assist you with packaging design and label creation based on your specific needs. We support you in selecting the best secondary packaging and the best suited cargo optimization. We believe that well-designed packaging not only enhances the product but also represents the best solution for ensuring the environmental and economic sustainability of your products.

## After-Sales Support

Our multilingual customer service is at your disposal to assist with daily needs and promptly resolve any requests related to the services we offer.

## Returns Management

We manage returns through structured and fully traceable procedures, conducting thorough checks on the condition of products and reinserting them into the warehouse according to the methods agreed upon with you.

By doing so we ensure order, transparency, and reliability at every stage of the process.
